1

# What Are Providers?

Think of providers as  
Terraform's bridge to the cloud.  
They connect you with AWS,  
Google, Azure, and others.

2

# The Role of Resources

Resources are your building blocks. From servers to databases, they define what gets created.

3

# Why They Are Important

Providers and resources work together. They let you manage everything from a single place.

4

# Getting Started Tips

Choose the right provider, declare resources clearly, and test before deploying. Simple steps to start.

Your Infrastructure Ally

# Harness Terraform Now

Master Terraform providers and resources to streamline your cloud work.

Manage you infra with ease!
