

Get Started with Confidence

# Mastering Terraform Basics

Find out what makes Terraform  
tick in just 4 slides!

Nee1 Shah

Keep swiping >

1

# What is Terraform?

Think of it like a tool to set up servers and networks without sweating.

2

## Why Use It?

Simplifies complicated tech setups, saving you a bunch of time.

3

# Key Language Parts

Resources, variables, and outputs are the basics you'll deal with.

4

# Getting to Know HCL

HCL is the special code lingo used by Terraform. Easy once you get it.

You Can Do It

# Become a **Terraform** Pro

Just a little practice with  
writing code, and you'll be set.
